The following instructions are for TCNJ Students Only for obtaining a license of the Matlab software.

Step 1: Create a MathWorks Account
To activate the software, you must have a MathWorks Account. You can use an existing MathWorks Account, but the email address used for the account must include your university's email domain and the account must be set up for academic use.

You can create an account at the MathWorks Web site by going to
http://www.mathworks.com and then click the **Create Account** link. When you create the account, make sure to set it up for **Academic use (including campus/site license use)**. **Do not select the Student use option**.

Step 2: Add the TAH Student License to Your Account
To activate the software, you add the TAH Student license to your MathWorks Account. To do this, use the Activation Key for the TAH Student License.

The Activation Key for TCNJ Students is 62721-90156-13422-62383-55926

To add the TAH Student license to your account at the License Center, follow these instructions:

Log in to your MathWorks Account at the MathWorks Web site.
On the your Account Main Page, click **Manage Licenses**.
On the Licenses page, click **Add License**.
In the Add License dialog box, select **Activation Key** and click **Continue**
Enter the Activation Key for the TAH Student license and click **Continue**

Activation Key: 62721-90156-13422-62383-55926

The license should appear on the screen in your list of licenses. Click to select it and in the License Details area, click **Download Products**. Follow the instructions on each dialog box in the download procedure.

Step 3: Install the Software

Start the MathWorks installer:
• Windows: Double-click the setup.exe file.
• Macintosh: Double-click the InstallForMacOSX file.
• Linux/Unix: Run the install.sh script.

Choose to **Install using the Internet** and click **Next**.

Review the software license agreement and click **Next**

Log in to your MathWorks Account, specifying your email address and Password
Select the license from the list of available licenses (you should only have one unless you have previously had a license connected to your Mathworks account). Click Next.

Select the **Typical** option in the Installation Type dialog box.

Specify the folder in which you want to install the software and click **Next.**

Confirm your choices and click **Next.**

In the Installation Complete dialog box, click **Next** to proceed with the activation of the software.

Confirm your activation information in the Confirmation dialog box and click **Activate** to activate the software.

Complete the activation process by clicking **Finish** in the Activation Complete dialog box.
